Computer Programming / Programmer

Düvenciler Anatolian High School

2008-2012

PROFILE

Innovative and detail-oriented Front-End Developer with a passion for crafting seamless user experiences. Proficient in HTML, CSS, and JavaScript, I specialize in translating design concepts into responsive and interactive web applications. With a keen eye for design and usability, I excel at creating visually stunning and user-friendly interfaces. Experienced in working with modern frameworks such as React and Angular, I am dedicated to staying updated with the latest industry trends and best practices. My goal is to leverage my skills and creativity to contribute to the development of cutting-edge web solutions that delight users and drive business success.

Additionally, I am expanding my skill set with Next.js and have recently completed my first project: my personal profile website, tunahankutlu.com.

For more of my skills and to contact me, feel free to visit my website.

PROJECTS I HAVE BEEN INVOLVED IN

- Project Name: Kale.com, Alisgidis.com, Nevade.com, biboya.com
- Project Description: The Kale.com Alisgidis.com, Nevade.com, biboya.com redesign project aims to improve user experience and strengthen brand image. By modernizing the existing site, the goal is to provide users with a user-friendly interface and impressive visuals to enhance their shopping experience. Responsive design principles were applied to ensure accessibility across various devices, including mobile.
- Technologies and Tools Used:
 - HTML5, CSS3, JavaScript
 - Bootstrap framework
 - jQuery library
 - Responsive design principles
- Development Process:
 - During the design phase, user research and market analysis were conducted to determine a user-friendly interface for the new site.
 - The design was coded using HTML, CSS, and JavaScript. Bootstrap framework and jQuery library were actively utilized.
 - The site underwent testing across different browsers and devices (desktop, mobile, tablet) to ensure compatibility and necessary improvements were made.

Project Name: Dengekimya.com, kontrolmatik.com, densurf.com, chemistryforbetterfashion.com

Project Description: The Denge Kimya, kontrolmatik, densurf, chemistryforbetterfashion website is a customized web project developed for a company operating in the chemical industry. Utilizing the Umbraco CMS platform, this project aims to introduce the company's products and services, provide information to customers, and facilitate communication. Following responsive design principles, the goal is to ensure easy access for users from different devices.

Technologies and Tools Used:

- Umbraco CMS
- C# programming language
- HTML5, CSS3, JavaScript
- MVC architecture
- SQL Server database
- Responsive web design principles

Development Process:

- During the design phase, user needs and expectations were analyzed to design a user-friendly interface.
- The site was coded and customized using Umbraco CMS, with backend development carried out using the C# programming language.
- In the graphic design process, visuals were created using Photoshop to align with the company's brand and integrated into the site.
- During the testing phase, user experience and performance tests were conducted to address potential issues and prepare the site for launch.
